

I would just like to say that I am a listener of K-Love and I sure would be sad to see it go off the air. If there is any way of keeping it on that is what I would prefer. I know many people benefit from listening to them and unlike many other stations, I leave the car feeling uplifted and excited about the day. Thus, helping me to be better friend to society. I don't know much about the Low Power and it sounds like it could have some good environmental benefits so perhaps there would be a way to do both. Nonetheless, I would like to keep KLOVE on the air if at all possible. I think you will see hard consequences across the country if it leaves the airways. thank you.
